

ALANOD THE MIRO® COMPANY  
NEVER ACCEPT LESS THAN THE ORIGINAL

ALANOD-SUNSELECT GmbH & Co. KG

## PRESSEMITTEILUNG • PRESS RELEASE

***We confirm that the environment protection systems for ALANOD and ALANOD-SUNSELECT have received certification according to DIN EN ISO 14001***

*In order to meet the ever increasing world wide demand of surface enhanced aluminium and copper, it is essential for ALANOD Aluminium Veredlung GmbH and Co. KG in Ennepetal and the daughter company ALANOD-SUNSELECT GmbH and Co. KG in Lauenförde to increase productivity and continually improve production processes, leading to a reduction in costs. However, to guarantee long term success, it is vital to also save resources and conserve the environment.*

*Based on the entrepreneurial goals of our owners, an environment protection system has been established parallel to the quality assurance systems which were first certified in 1993. This year, this environment protection system has been certified for both factories, to DIN EN ISO 14001: 2005, as confirmed in November 2007 by the independent auditors, DQS.*

*With these certified quality and environment protection systems, we meet the world wide acknowledged standards. We are prepared to meet the requirement to combine economic success with environmental responsibility, while catering to the requirements and wishes of our customers.*
